

# Middle C Position

We call this the **Middle C Position** because:

1. Both our thumbs share middle C, and
2. We use 5 fingers (on different **white keys**, next to each other) for this pattern!

Remember, we can find **middle C** by finding the 2 **black keys** in the middle of the piano and looking for the **white key** at the **bottom** (or to the **left**)!
